

## CN Roundhouse & Conference Centre

The Roundhouse & Conference Centre will convert from its primary function as an exhibit building to a unique meeting and conference facility with up to 21,000 square feet of clear meeting space. This is accomplished by rolling out the heritage locomotives and cars, paneling in the trackways, and setting up the meeting or dining venue in the space.

### **Facts:**

- the Grand Hall accommodates 1,200 people theatre style or up to 800 people banquet style
- the Grand Hall group set up is accommodated by moving central train exhibits outside
- one side of the building is floor to ceiling windows featuring spectacular mountain views through the curving glass wall
- there are four (4) breakout rooms available for conferences and events
- servery in southeast corner for caterers to work from
- building features geothermal heating and cooling to reduce its environmental footprint
- seven sets of custom built large wooden train doors can be opened and closed to provide as much natural light and air flow as desired as well as amazing views of heritage artifacts on the Turntable Plaza
- a mezzanine level acts as a public walkway with great overview perspective of the Grand Hall and will be the future home of two offices and a 16-20 seat board/meeting room
- the upper viewing gallery and outside deck offers a unique space to host a reception with capacity of 150. Both offer incredible panoramic views of the Heritage Park, Turntable Plaza, and surrounding mountains

### **For a 360 degree view of the facility visit:**
